

Bounce Benefactress *A real gem!*

Sun rises on earth

Bounce— a gift to the world●

All women on earth are facing the same problems, whether you live here, in a african village, a middle east kingdom or in the rice paddies of China, every one of us is lives with the same threats. Global warming, hunger, shortage of water, new infectious diseases, ignorance, fear and hatred.

Nobel Prize Laureate, Dr. Mohammad Unis, started Micro-lending with the Grameen Bank in 1990, “giving loans to the poorest women in Bangladesh **relying solely on their integrity**”. The loans are repaid at a 99+%. The greatest success is of amu social entrepreneurship program and it started with women.

Women, more than men, find ways of dealing with conflict without violence, women come up with more creative solutions to complex social problems, women extend ourselves to help one another, and women support women.

As much as well all share the same problems we all have same needs; food, shelter; safety, belonging, love, self-esteem and altruism. We all have the same emotions, fear, anger disgust sadness and joy. When we manage our emotions and meet our needs we can change life on earth.

If each of us lives our lives with the intention of being **our** personal best, and each of us help 10 other women to be their personal best, what on earth might happen? If each recites the Bounce Pledge and lives the Bounce Values could we solve the worlds problems? –Yes. Could we have world peace, feed and educate the world’s children, stop global warming, Yes, we can. Let’s *Bounce* the world.

A gift of \$250 or more makes you a *Bounce Benefactress*, a real gem!
